- React
- React Native
- HTML 5
- CSS/SASS

- Node.js
- Express
- NestJS
- Next.js
- MongoDB

- Firebase
- Java OOP
- Python

RELEVANT EXPERIENCE

Technical Support Engineer

Durable   Mar 2023 - Sep 2023

Durable is a platform for business owners and entrepreneurs that offers features like: AI powered website generation, blog posts, marketing and CRM. My main activities as a technical support engineer were solving technically escalated tickets. Those included a wide range of tasks like:
- Solving database MongoDB conflicts and troubleshooting in tandem with the development team;
- Custom client code troubleshooting (HTML, CSS and JS);
- Solving SSL generation problems w/ CloudFlare and DNS configuration;
- General app QA and reporting bugs and request to the development team;
- Premium accounts onboarding calls;
- Developing the help center articles and educational videos.

Junior front-end developer

Aula.Vip - Freelancing   Feb 2023 - Apr 2023

As a freelancer, my activities range from general bug fixing to the implementation of new features. The platform is not yet being advertised but it's already online: https://aula.vip

- Next.js, Tailwind and, MongoDB;
- General bug fixing and improvements;
- Implementing Live Worksheet integration for homework creation.

Front-end engineer

Langara's Course Project   Sep 2021 - Dec 2022

As a front-end developer and PM, my main activities consisted of developing and planning the first wireframe of the applications, developing a design-accurate version of the screens assigned to me, assigning tasks, making sure our targets and standards were being met, and creating a bridge between the design and development teams.

Front-end engineer
- Developed EveryPage, a book-sharing and digital library app in React Native, NestJS, MongoDB, and Firebase;
- Developed Billy, an invoice generator and freelance finance tracker in React, SASS, NodeJS, and MongoDB;
- Developed Adventure BC, a hiking planner with JavaScript, HTML, SASS, and Firebase;
- All projects were developed following industry standards of version control and Agile methodology;
- Reviewed and merged code on GitHub following industry standards.

Project Manager
- Setup repositories and issue tracking for the team;
- Facilitated strategic meetings between teams.

Senior industrial designer
Marcopolo AS, Brazil   Jan 2015 - May 2021

As a senior industrial CAD designer, I was responsible for the concept and development of the chassis and drivetrain for new gas and electric vehicles.

Industrial designer
EDAG do Brasil, Brazil   Mar 2010 - Dec 2014

Cross-functional product designer responsible for Body in White, Chassis components, and brake systems.

ACADEMIC FORMATION

Web & Mobile App Development
Langara College - British Columbia, Canada - Dec 2022
Graduated with distinction

Langara's course is designed to mimic a startup environment, having designers and developers working together to conceptualize and develop products.

Achievements:
- Awarded second-best capstone project;
- Awarded 4 times for the Dean's Honor Roll.

Bachelor of Mechanical Engineering
Anhembi Morumbi University, Brazil - Dec 2019

Achievements:
- Awarded the Dean's Honor Roll.

INTERNATIONAL EXPERIENCE

- **India - Pune**   Apr 2018 for a week
  As a facilitator for TATA-Marcopolo relations and nationalization of a chassis for the Indian market.
- **Germany - Fulda**   Jun 2014 for a month
  Handover of a project for a new MAN vehicle.
